

Helping With Math Homework

Math homework offers its own unique challenges.

Try these tips to help your child learn math and become an independent learner in the process.

Practice, practice, practice. Talk to your child and ask how excellent athletes, musicians, actors, and other performers got to be so good, and he'll be able to tell you - practice, and plenty of it, is key. Same goes for practicing for math. It's important for your child to work on math problems each night at home.

Organize. Help your child organize her time, study space, supplies, and routines. Help her create a quiet, comfortable well organized space that's as free from distractions as possible. Math in particular - because of its daily practice - needs an assignment book. If she tells you she doesn't have any math homework, assign it yourself.

Math Camp

During Christmas Break Sylvan always offers Math Camp to improve math facts.

Sylvan of Eugene and Springfield

1020 Greenacres Rd. #11, Eugene, OR 97408
